

FABRIC STAMPING

Stamping fabric using Cedar Canyon rubbing plates and Colourcraft fabric colour. Using a sponge roller, roll the fabric colour onto the flat surface of the rubbing plate.

Be careful not to get colour on the outer edge of the plate, as this will create an unwanted line.

Place plate face down onto fabric and roll over back of plate with hard rubber roller. Carefully remove plate and your image will be revealed.

When dry, iron fabric to set colour. Leave 24hours before washing.
